

Please do not lift the "Do not call list". We still get calls from time to time but not as frequently. My mother & father are in their 80's. My mother is bed ridden and my father is caring for her. He has arthritis and does not get around as well as he should although he is constantly tending to my mother's needs. He doesn't need telemarketers calling and adding more movement for him. Just an example as to how important it can be to stop these calls. thank you.
